

DURAN DOĞAN

SUSTAINABLE POLICY

Sustainable growth has become one of the most vital issues of the agenda in today's world where natural environment is being rapidly polluted and resources are gradually decreasing. Duran Doğan Basım ve Ambalaj A.Ş. has been developing and implementing project to raise awareness of the whole society beginning from its employees for protection of natural resources and sustainable development in order to leave more livable world for future generations.

Duran Doğan Basım ve Ambalaj A.Ş. is committed to carry out studies in order to minimize negative impacts of its activities on the physical environment with the Carbon Disclosure Project (CDP), and undertook leading role in Turkey's packaging industry.

Duran Doğan Basım ve Ambalaj A.Ş. has been conducting studies for optimal use of natural resources, and minimization of environmental pollution to maintain people's live at a good level with awareness of requirements and responsibilities to use natural resources they need in a renewable way.

The following are some of these studies;

- Carry out regular volatile organic gas analysis by an accredited organization,
- Collect recyclable materials (paper, plastic, etc.) on a regular basis through waste classification within the company for effective use of natural resources, using photovoltaic systems at some stations to reduce water and electricity consumption,
- Dispose waste oils (hydraulic oil, etc.) at technical workshops in licenced waste incineration facilities.
- Dispose hazardous waste resulting from operations in recycling companies which are licensed by the Ministry of Environment and Urbanization,
- Use equipment that does not generate emission (rechargeable forklifts, etc.).
- Dispose /recycle office waste generated at business units in recycling companies which are licensed by the Ministry of Environment and Urbanization.
- Assess Waste inventory every year in order to evaluate the environmental performance, and issue "Environmental Performance Reports" within the company
- Purchase new equipment in compliance with EU environmental norms
- Ensure compliance with the EU standards on preventing environmental pollution.
